Introduction

Mayara TSI is an IT solution company working to find simple, and better solutions in the domain of Education. This is an era of transformation. Everything around us is becoming smart! As an IT solutions company, we facilitate this change with our innovative systems.

Smart Click

Smart Click is one window application to manage all the activities of a school in one system. It eliminates your need to have separate solution for every activity. It segregates different domains, and generates a wholesome report for further analysis.

Smart Click assists in upgrading the standards of any school. It is equally helpful for the management as much as for transforming the educational standards, increasing the security systems, bridging the communication gap between students, parents, faculties and management teams.

The Smart Click works with your current infrastructure, and leverages existing technology. It centralises the mountains of data to learning, and automates routing administrative functionality. This package has education's most flexible and interactive scheduling function. Thus, by meeting the communication, and information needs of the entire Institute community in real time. Smart Click is a single interface for every requirements of a school.

It has an exceptionally simple, and attractive user interface, enriched with modern, and easy-to-use GUI components
